

# CPH, Cutting Edge of Technology

Chatswood Private Hospital (CPH) is committed to continually research and obtain the latest in cutting edge technology that the Ophthalmic industry has to offer. Following successful a successful trial, CPH has purchased the Zeiss Mel80. CPH has continues to investigate the latest technology, currently running trials of the Alcon Verion Image Guided System and the Zeiss Callisto eye.

## ZEISS Mel80

CPH are excited to offer the Mel80 as an extension to the services available, further supporting Ophthalmologists in the scope of procedures available. The Mel80 is designed to make the correction of vision defects even safer, more

patient-friendly and individual. CPH is one of the few private hospitals in Australia to have an excimer laser available in a licensed facility, thereby allowing MBS items numbered and health insurance rebateable procedures for refractive surprise and Phototherapeutic Keratectomy.

## Alcon Verion Image Guided System

The Alcon Verion Image Guided System is a suite of integrated surgical planning and digital guidance technologies designed to help eye surgeons consistently achieve their refractive targets for patients undergoing cataract surgery. It consists of multiple proprietary technologies, including the VERION Reference Unit and the VERION Digital Markers, each designed to help eye surgeons add greater accuracy and efficiency during the planning and executing of refractive cataract surgery.

## ZEISS CALLISTO eye

ZEISS CALLISTO eye facilitates premium IOL surgeries. The assistance functions are injected directly into the eyepiece of the ZEISS OPMI LUMERA family surgical microscope, providing improved ergonomics without distraction from the surgical field. In addition, ZEISS CALLISTO eye is equipped with automated eye tracking, ensuring that the position of the superimposed assistance

functions are properly positioned on the eye.

# CPH Attends Annual WAEH Conference

In June, Roger Cronin, CEO and Feng Neal, CFO travelled to the USA to partake in the 12th Annual World Association of Eye Hospitals Conference. The World Association of Eye Hospitals Annual Conference was held in Ann Arbor, Michigan at the Kellogg Eye Centre, attended by leaders in eye hospitals from all over the world. Attendees then visited Johns Hopkins Wilmer Eye Institute, Baltimore and The Bascom Palmer Eye Institute in Miami. Lasting from the 6th-12th of June, the conference and hospital visits covered a range of topics in the developments of ophthalmic care.

With nearly 100 attendees, from 20 different countries, the conference was an invaluable opportunity for our management team to bring fresh ideas on ophthalmic care back to Australia. [Click here](#) to read more.

# Featured Doctors
